

About FlexiTime

Founded in 2008 by Robert Owen, FlexiTime is a Wellington-based software business committed to creating beautiful workforce management solutions. Our purpose is to help employers, employees and contractors achieve Work.Life.Success™, because when work and life are in balance, we all succeed.

Our cloud-based products include payroll, time tracking, contractor management, rostering software and freelance management. We believe technology should enable people to make the most out of life by automating and streamlining traditionally complex and admin intensive day-to-day tasks, so you can spend your valuable time on what's really important.

The FlexiTime Team

PayHero®

PayHero makes payroll simpler and more intuitive for New Zealand employers, employees and partners. PayHero is focused on compliance and follows the very latest Holidays Act guidance from MBIE. Incorporating online timesheets, employee self-service, leave management and automated payday filing, PayHero provides payroll solutions for Kiwi businesses of any size. PayHero was honoured as Payroll Software Solution of the Year by the Institute of Certified New Zealand Bookkeepers in July 2022, for the second consecutive year.

DROPPAH

Droppah helps businesses roster staff while tracking time to control costs and optimise coverage. Droppah also integrates with our payroll software PayHero to sync time and employee leave through a deep two-way integration.

Karmly

Karmly takes care of timesheets and billing for recruitment agencies and other companies with a contingent workforce. Karmly increases billing accuracy and helps agencies get paid faster with timesheets, client approvals and batch invoicing.
